

# Brandt Stop Foam

Defoamer and Foam Suppressant

Product Data Bulletin

## Features

- Aids safety
- Designed to defoam agricultural spray tanks
- Economic and non-toxic
- Simple to use

BRANDT STOP FOAM is very effective for controlling both entrained and/or surface foam in most agricultural sprays and equipment.

BRANDT STOP FOAM is a highly concentrated, high strength silicone emulsion defoamer which kills foam in it's tracks, and prevents the reforming of foam.

Agricultural spray tank solutions may contain various hazardous substances that may generate foam. If the foam were to overflow the tank on areas not meant for these chemicals, damage may occur.

BRANDT STOP FOAM solves the problem by stopping the foam, and preventing it from reforming. The use of BRANDT STOP FOAM also speeds up the filling of tanks by not having to contend with foam.

## Directions for Use

To control foam prior to forming use BRANDT STOP FOAM at a rate of 1-2 fl. oz. per 100 gallons of solution. If foam persists an additional 1 to 2 fl. oz. may be required. Rates of BRANDT STOP FOAM may vary depending on type of agitation, chemicals being used and water quantities.

Prior to use, read and follow all directions on this label and on the label of the pesticide being used. The pesticide manufacturer's label for specific usages and restrictions have precedence over DIRECTIONS FOR USE referred to on this label.

## Principal Functioning Agents

Polydimethylsiloxanes .....	10.0%
Constituents Ineffective as Spray Adjuvants .....	90.0%
Total .....	100.0%

All ingredients are exempt from the requirements of a tolerance under 40 CFR 180.
